PROFESSIONAL SUMMARY

Motivated and analytical undergraduate pursuing a BSc (Hons) in Data Science at Sri Lanka Institute of Information Technology (SLIIT) and a Bachelor of Physical Science at the University of Sri Jayewardenepura. Possesses a strong foundation in data analytics, statistical analysis, software development, and problem-solving. Experienced in developing data warehouse solutions, business intelligence systems, web applications, and Android applications through academic and personal projects. Passionate about leveraging data-driven insights and technology to solve real-world problems and eager to contribute to innovative projects through internships and entry-level opportunities.

EDUCATION

BSc (Hons) in IT (Specializing in Data Science) - Sri Lanka Institute of Information Technology (SLIIT)
2023 – Present

- Current CGPA: **3.45 / 4.00**
- Recipient of the Dean's List award

Bachelor of Physical Science - University of Sri Jayewardenepura
2023 – Present

- Pursuing studies in Mathematics, Statistics, and Economics.

G.C.E. Advanced Level (A/L) – Mathematics Stream

- Mahinda Rajapaksha College, Matara

PROJECTS

CarRentalDW — Data Warehouse & Business Intelligence Project

- Designed and implemented a data warehouse solution for a car rental business.
- Developed ETL workflows to integrate and transform operational data.
- Applied dimensional modeling and data warehousing concepts to support analytical reporting.
- Generated business insights for decision-making purposes.
- **Technologies:** SQL, ETL, Data Warehousing, Business Intelligence

[GitHub](#)

Auto Elite — Automotive Service Management System

- Developed a service management platform for automotive businesses.
- Implemented vehicle service tracking, customer management, and scheduling features.
- Designed and managed database operations for efficient information handling.
- **Technologies:** Java, Database Systems, Web Development

[GitHub](#)

Smart Campus Operations Hub

- Contributed to the development of a centralized campus management system.
- Assisted in designing and implementing modules to improve operational efficiency.
- Worked collaboratively using Git and Agile development practices.
- **Technologies:** Full-Stack Development, Database Systems, Team Collaboration

[GitHub](#)

Mobile Application Development Project

- Developed an Android application demonstrating core mobile development concepts.
- Designed user-friendly interfaces and implemented application functionality.
- Applied object-oriented programming and Android development best practices.
- **Technologies:** Kotlin, Android Studio

[GitHub](#)

SKILLS

- **Programming Languages:** Python, SQL, Java, Kotlin, JavaScript, C, C++
- **Data Science & Analytics:** Data Analysis, Data Visualization, Statistical Analysis, Machine Learning, Data Warehousing, Business Intelligence
- **Libraries & Tools:** Pandas, NumPy, Scikit-learn, Jupyter Notebook, Power BI, Git, GitHub
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Development Practices:** ETL Processes, Database Design, REST APIs, Version Control, Agile (Scrum), Team Collaboration
- **Soft Skills:** Problem-Solving, Critical Thinking, Communication, Leadership, Time Management, Teamwork

CAREER OBJECTIVE

To secure an internship or entry-level position in Data Science, Data Analytics, Machine Learning, or a related field where I can apply my technical knowledge, analytical skills, and academic experience to solve real-world problems while continuously learning and growing as a professional.
